

## My DNA Evidence

Objective and Rationale: In the film Gattaca, the hero of the film, Vincent, has to work very hard to be sure he doesn't leave any traces of his own DNA at work. If you haven't seen the film, he's trying to impersonate someone else. Think about the activities you do. Which ones leave traces of *your* DNA behind? Make a list of the activities you do that leave DNA evidence.

**KEEP YOUR LIST G-RATED!! DO NOT INCLUDE ACTIVITIES THAT ARE INAPPROPRIATE FOR CLASSROOM DISCUSSION!**

What do we use DNA evidence for now?

In a Gattaca world, how easy would it be to find you?
