Mr. Ulrich/Mrs. Ryan Name:…….
Biology

Gattaca Viewing Sheet

Pre-viewing questions:

1. List two things you think you know about heredity and genetics

2. List one or two things you'd like to learn about genetics.

3. Based on what you know now, how would you define the term *genetics*?

During the film: Good science fiction is loaded with technologies that are fantastical as well as familiar. While watching the film, fill out the chart below by identifying different technologies used in the film *Gattaca* as things that are used today, things that might be developed in the near future and things that will probably never be developed anytime soon (if at all).

Present tech	Near-future tech	Fantasy tech

For HW: Keep track of activities you do in one day that leave DNA evidence behind. Think CSI. Note the activity, form of DNA evidence and time you left it. **KEEP IT G-RATED**. Use the sheet being handed out at the end of class and answer the two questions at the bottom of the sheet.
