

Famous Mutations Assignment

Directions: You are a doctor that has patients with the following diseases. Write what you would tell each person about

- their disease and the affected organs.
- treatments – what relieves the pain.
- which chromosome has the mutated gene
- a famous person who's had the disease.

Your answer should be written in full sentences.

Patient A has *cystic fibrosis*. What will you tell them?

What was your information source for this disease?

Patient B has *sickle cell anemia*. Help them learn more about their disease.

What was your information source for this disease?
