

Organelle Organizer

Organelle	Sketch	Specific Function(s)
Nucleus		<div style="border: 1px solid black; padding: 5px; width: fit-content; margin-left: auto; margin-right: auto;">Principle life processes</div>
Nucleolus		<div style="border: 1px solid black; padding: 5px; width: fit-content; margin-left: auto; margin-right: auto;">Principle life processes</div>
Endoplasmic reticulum		<div style="border: 1px solid black; padding: 5px; width: fit-content; margin-left: auto; margin-right: auto;">Principle life processes</div>
Ribosome		<div style="border: 1px solid black; padding: 5px; width: fit-content; margin-left: auto; margin-right: auto;">Principle life processes</div>
Golgi body		<div style="border: 1px solid black; padding: 5px; width: fit-content; margin-left: auto; margin-right: auto;">Principle life processes</div>
lysosome		<div style="border: 1px solid black; padding: 5px; width: fit-content; margin-left: auto; margin-right: auto;">Principle life processes</div>

Vacuole			Principle life processes
Cytoplasm			Principle life processes
Cell membrane			Principle life processes
Cell wall			Principle life processes
Chloroplast			Principle life processes
Mitochondria			Principle life processes
